## Customer Reviews

I've cussed the inaccuracies in this book more times than is printable. Benner claims to have canoed every single foot of every single river listed in the book, but it's pretty obvious by the listing of some very glaring errors that he hasn't. Still, if you intend to canoe or kayak eastern NC flatwater rivers, you'll need this book. It is 95%-98% accurate, but those 2%-5% errors are doozies. Use it as I think it was intended, as a guide, not as gospel, and you'll be okay. My copy has long been my canoeing logbook, too. After every trip, I sit down with my canoeing partner of that trip and fill the book with notes of interesting things seen and make corrections of errors listed in the book, writing in the book itself. That way, when I do another trip with another bowman, I don't have to depend on memory to highlight important things to come about the given flatwater NC river.

Just the value of the listings of put-in's and take-out's exceed the price of the book. All the distances and many help facts are bonus. Anyone paddling Eastern NC would be foolish not to own this book.

It presented nothing but the facts! If you know where you wanted to kayak and needed stats on it, this is the book for you. I wanted a book to entice me to take a particular river over another. This was NOT that book.

Many of the spots have changes since 1985, but still a good starting point. There is a more recent version you may want to Spence a little more for.
