# Exchange-Traded Funds And The New Dynamics Of Investing (Financial Management Association Survey And Synthesis Series)

## Synopsis

In *Exchange-Traded Funds and the New Dynamics of Investing*, Ananth Madhavan examines the quiet transformation of asset management through the rise of passive or index investing. A closely-related phenomenon is the rise of exchange-traded funds (ETFs). An ETF is an investment vehicle that trades intraday and seeks to replicate the performance of a specific index. ETFs have grown substantially in size, diversity, and market significance in recent years. These trends have generated considerable interest, especially from retail and institutional investors and increasingly from academics, regulators and the press. ETFs have the power to be a disruptive innovation to today's asset management industry because many traditional active managers and hedge funds deliver a significant fraction of their active returns via static exposures to factors like value. Indeed, for the first time ever, assets in global ETFs exceeded \$3 trillion in 2015, passing the amount in hedge funds.

## Book Information

Series: Financial Management Association Survey and Synthesis Series

Hardcover: 288 pages

Publisher: Oxford University Press; 1 edition (July 27, 2016)

Language: English

ISBN-10: 0190279397

ISBN-13: 978-0190279394

Product Dimensions: 9.4 x 1.2 x 6.3 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)
