Magic Lantern Guides®: Nikon D7000 CLS Flash Companion

Synopsis

The complete guide to Nikon flash! Packed with diagrams, instructions, and tips, Magic Lantern is the world's most popular brand of camera guide, and now this camera-specific, flash system-specific companion guide takes the photographer deep into Nikon's advanced but complicated Creative Lighting System. It covers every flash unit and its features, explains how it functions with specific cameras, and includes insider techniques from photographers who shoot with the camera. This flash guide will help you get the most from your gear by: Cutting through the clutter: this guide is written specifically for the Nikon D7000 and the Nikon Creative Lighting System, and does not feature unnecessary general how-tos. Instead it thoroughly explains every feature and menu option in easy-to-understand language. Showing you how to use every flash function such as TTL control, the flash synchronization modes, manual flash exposure control, wireless flash control, and more-expert advice that will improve your results. Unraveling the mysteries of flash with simple tips you can apply every time you shoot: learn about front and rear sync, how to balance foreground and background brightness, how best to use fill flash, and much more.

Customer Reviews

Like all reviews this is personal experience. That is the nature of the beast. Here are the reasons I

like this book. It is easy to read. This means I can see the print and make it out. It is well written. Have you ever tried to read the User's Manual from Nikon? If you rely on them your patience is astounding. Are you experienced in photography? So am I, but not in digital photography. It is a totally different ball game. Nikon assumes anyone who buys their cameras knows everything they need to know about their use. Dream on. If this is such a great book, why only 4 stars? My two flashes are the Nikon SB400 and SB700. Both good flashes with different capabilities. The book mentions both of these but, naturally concentrates on the more expensive Nikon SB910. I am able to get valuable information from this book by reading between the lines and applying what I learn to my flashes. My recommendation of this book is for serious amateurs. If you are an experienced professional why would you bother with this?

I have many books on the D7000! I pre-ordered this book, and couldn't wait to get it. I have the SB-700 flash and this book has chapters on each of the SB-700,800,900,910 flashes. Excellent book, lots of step-by-step instruction, graphs, and screen shots of how to set in-camera. Book is easy to read, and perfect size to fit in my Lowpro Fastpak 100 camera bag (with my flash in soft case). Great book on the CLS system!

Magic Lantern produces a series of books on Nikon's CLS for each Digital camera in the Nikon line-up. If you really want to learn how to select and use the right flash for your Nikon DSLR, these are the books you need. They are well-written with many illustrations and will introduce you to lighting techniques you probably never considered.

One of the best tools available on a market to understand Nikon CLS. It is doesn't matter what you have - Nikon D7000 or Nikon D800 - law of physics working the same for all models.. Buy it if you want to learn more about different flash lights and understand CLS deep inside.
