ACSM's Resources For Clinical Exercise Physiology: Musculoskeletal, Neuromuscular, Neoplastic, Immunologic And Hematologic Conditions (Acsms Resources For The Clinical Exercise Physiology)

Synopsis

This Second Edition is designed to provide a resource for exercise clinicians working with patients suffering from a wide variety of chronic diseases and disabilities beyond cardiovascular and pulmonary disease, including orthopedic, neurologic, metabolic, musculoskeletal, neoplastic, and immunodeficiency conditions. Following the authors' expert advice and illustrative case studies, readers will learn how to work with these often underserved populations by providing them with exercise evaluation, prescription, supervision, education, and outcome evaluation. Each chapter, dedicated to a specific disease or disorder, gives a solid understanding of epidemiology, pathophysiology, diagnosis, and medical and surgical treatments. A companion Website will offer the fully searchable text and interactive quizzes.

Book Information

Series: Acsms Resources for the Clinical Exercise Physiology

Paperback: 368 pages

Publisher: LWW; Second edition (January 23, 2009)

Language: English

ISBN-10: 0781768705

ISBN-13: 978-0781768702

Product Dimensions: 0.8 x 8.5 x 11 inches

Shipping Weight: 1.7 pounds (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars [See all reviews](#) (6 customer reviews)

Best Sellers Rank: #240,199 in Books (See Top 100 in Books) #106 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Physical Medicine & Rehabilitation](#) #135 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Sports Medicine](#) #146 in [Books > Medical Books > Medicine > Internal Medicine > Physical Medicine & Rehabilitation](#)

Customer Reviews

A great resource to have if you are working in the clinical setting or for school work.

Good but difficult book

Good product
