## Customer Reviews

I have been a certified lymphedema therapist for 10 years. This book is a **MUST HAVE** for all clinicians who are either certified as a lymphedema therapist, or who just want more information about lymphedema. **PATIENTS AS WELL** will benefit from the resources in this book. Joachim Zuther is **THE AUTHORITY ON LYMPHEDEMA**. I had the honor of being his student in 2002 when I became lymphedema certified. His experience with treating patients with lymphedema and knowledge of this subject is **VAST**, to say the least!!! He is the founder of the Academy of Lymphatic studies, and is on the board of **LANA - Lymphedema Association of North America**. I believe he even helped found this association. In his book, Mr. Zuther presents the information in a concise, **EASY TO READ** manner. Even the lay person who is not a clinician could read this book and have a good understanding of all the components of lymphedema, including causes, types of lymphedema, and treatment for lymphedema. The book is laid out in chronological sections, beginning with the explanation of 'what is lymphedema', followed by lymphatic anatomy, the job of the lymphatic system and causes of the 2 types and 3 stages of lymphedema (4 stages, if you count 'latency'). Mr. Zuther then explains treatments **AND TECHNIQUES** for lymphedema, including **MLD** (manual lymphatic drainage), Compression, skin care, and exercise. I own other books on lymphedema, but this particular book is the **EASIEST** to understand and is, in my opinion, the **MOST COMPLETE, ACCURATE and CONSISE** book there is on lymphedema. **THIS BOOK** is the **ONLY** book you will ever need!! I refer to this book all the time, and my other lymphedema books are just sitting on the shelf collecting dust because I don't need them!

Far more info than one needs. OK not if you are a student of course. I knew this when I ordered it so no surprise there. But man I do wish our MD doctors would get with the program and offer treatment for this condition or at least acknowledge it. In the 90's I was told it's cosmetic. I heard that into the 2000's. They would offer me a mild diuretic and those who know even then...they do not work with this condition. They may dry up your eyes and suck real water weight or retention such as period gain but it does nothing for pitting edema which is lymph waste that is not being removed by your body as it should for what ever reason had happened to cause this. And so much more could be offered to the patient if they just admitted it to themselves...it is anything but cosmetic. It can and does often lead to ulcerated sores and hard to heal skin lesions which can also lead to extreme pain and misery and worse life threatening infections or allow secondary infections to develop. I was sent

to a dermatologist once during one of these skin eruptions and was told no you just have dry skin that is not edema related. Lets see I've had over a dozen such episodes now and it never responds to lotion for dry skin they like to sell or prescribe to you. Only antibiotic cremes and pain relief ingredients in some of those help with the severe burning and itch and pain and also help to calm it down where it can heal. I do challenge the medical field and so called MD's who still after 20 years with this condition claim it's only cosmetic. Really sores and open wounds are only cosmetic? So sorry I disagree. I also disagree that the swelling and severe swelling and buising due to that and other complications due to the retention of this waste in your body that leads to deformity and pain and though yes ugly...
