Best Sellers Rank: #65,534 in Books (See Top 100 in Books) #2 in [Books > Business & Money > Insurance > Casualty](#) #5 in [Books > Business & Money > Insurance > Business](#) #106 in [Books > Education & Teaching > Higher & Continuing Education > Test Preparation > Professional > Professional](#)

Customer Reviews

When you are studying for the insurance exam, you don't really know what to expect when you go to test. This book and CD are the most helpful tools in preparing for the test. I worked 5 years in insurance (underwriting) but did not sell insurance so I never needed to be licensed (FYI- underwriting thinks they know more than agents). Figured my job prepared me for the test- NO. This CD practice tests are what prepared me- there is so much information that you will never use but will be on the test. Before you test, you need to have your credits- most people get them from going to class. I did Kaplan self-study, which provides a book that is state specific and a test to take about your self-study. If you pass that test then they give you the required credits. Then you sign up for the testing site to get your actual license. When other reviews say that this is not state specific, you need to understand that every state is different and you need to rely on your textbook for your state

(provided by your class or self-study). The actual TEST- will have a few questions that are state specific but the majority of the questions are ones that are general and covered by this book & CD. I did the practice exams from the CD and was scoring in the 50% range...what this has to be wrong. I kept doing them over & over, the questions were the same word for word but the test always was different changing questions and orders. I must have taken 100 practice tests. When I was scoring in the 90% range- I went to the testing site. So surprised that as I'm taking the test, the questions were word for word from the practice tests...it was just like the CD regenerated a new test for me and I was flying through it. I PASSED, 1st time.

Predicated upon the glowing description of the "Exam Cram Property and Casualty Insurance License Exam" test manual, I decided to purchase it to augment other test guides in preparation for my upcoming Property/Casualty Insurance Producer's exam. I have no complaint with the book itself; with the exception of no state-specific material, it seems fairly comprehensive. I do, however, have a serious complaint about the CD-ROM Exam Simulator which is inoperable, based upon an evaluation generated by the CD itself, indicating that all but one of the .dll files had not been loaded. I contacted Pearson's (the publisher's) Customer Service department, and was given several different options, one of which was to send (1) the original receipt from (fortunately, I made copies); (2) a Xerox of the back cover, showing the ISBN number; and (3) my name, address, and phone number. Trustingly, I sent these data, assuming Pearson would send me a fully-loaded CD-ROM which I could use on my computer. Naturally, they did no such thing, instead, counselling me to "return the book to for a refund or an exchange." (I informed them that the fault lay with them - not - and exchanging the book might cause me to receive another CD-ROM that was equally defective.) My last e-mail to them was March 26th; to date, I have not heard from Pearson, and probably never will. I told them that it was foolish to incur the ill-will of a customer whomight have given them repeat business, but evidently, the customer's sensibilities (over a defective product) are of little moment to a publishing conglomerate.
