Sentinels In The Stream: Lighthouses Of The St. Lawrence River

Synopsis

The latest book in our lighthouses series features 48 exceptional lights of the St. Lawrence River, from the charming Thousand Islands to the breathtaking Gulf of St. Lawrence. In *Sentinels in the Stream*, two of North America's top landscape photographers join forces to capture the rugged beauty of the river and its lighthouses, on the shores, shoals and islands of upstate New York and Ontario and Quebec. Each lighthouse is profiled with its unique history and architectural highlights. Ex-lightkeeper Ted Cater -- now the supervisor for many of the lighthouses under the care of the Canadian Coast Guard -- provides an insider's view of St. Lawrence lightkeeping.

Customer Reviews

First of all, I love the format of this book - each of the 43 lighthouses has a full-page color photo, facing the text, which is mostly quite informative. Also the smaller size of the book makes it very suitable as a gift to any lighthouse aficionado. Anybody interested in the early history of Canada would enjoy getting/reading this as much as I have. While I'd like to give it 5 stars, I found in some cases the photos were overly artistic or at least, not truly a detailed portrait of what I wanted to see. One such example is the lighthouse at Bassin from 1871, described as "most beautiful" and "unusual" in the text. The very colorful photo is mostly of the cliff, with a boat in the foreground, and the very distant lighthouse in the diagonal opposite corner. Composition-wise, it's no doubt a postcard-worthy image ...

Great book

Would have liked more updated pix.
