Ethics For Architects: 50 Dilemmas Of Professional Practice (Architecture Briefs)

Synopsis

In this new Architecture Brief, *Ethics for Architects*, Thomas Fisher presents fifty case studies representing a broad range of ethical dilemmas facing today's architects, from questions regarding which clients to work for, to the moral imperatives of reclaiming building materials for construction instead of sending them to landfills. This timely book features newly relevant interpretations adapted to the pervasive demands of globalization, sustainability, and developments in information technology. Fisher's analysis of architecture's thorniest ethical issues are written in a style that is accessible to the amateur philosopher and appealing to professional architects and students alike. Thought-provoking and essential, *Ethics for Architects* is required reading for any designer who wants to work responsibly in today's complex world.

Customer Reviews

Great Resource! Thank You!

ETHICS FOR ARCHITECTS: 50 DILEMMAS OF PROFESSIONAL PRACTICE provides practicing architects with some fifty moral dilemmas at the workplace and offers solutions to each issue. From

issues of uncompensated work and corrupt politicians to cultural conflicts and dishonest behavior, this surveys situations that might affect any architectural decision or architect's practice and offers ethical solutions.

Received a 78% on architectural ethics for uni. Good book for first year students studying architectural management.

Great seller A+++
