Customer Reviews

For social media marketing courses aimed at lead generation and nurturing, Brian Halligan and Dharmesh Shah offer a complete primer on the subject. Their Inbound Marketing book provides a cradle-to-grave formula for applying social channels, SEO and content marketing as a substitute for outdated outbound marketing techniques. The book, in my opinion, qualifies academically as a primary reading for select undergraduate level courses focused on lead nurturing. The recommendation is based on the following: 1) As pioneers in the field, the authors provide a convincing argument why marketing should be taught using non-interrupting, permissive approaches to trust building. Especially at a time when scholars and practitioners are bombarded with complex optimization strategies, brand storytelling trends, ever changing mobile marketing strategies and costly engagement tactics, this book serves as a refresher as to why we got here in the first place. Concepts like building remarkable content, using your website as a marketing hub, designing effective landing pages and strategic placing the right calls to action are often lost in today's overcrowded library of content marketing books. 2) The book is well organized to fit a funnel strategy especially useful for sales personnel. Early chapters deal with getting found by prospects through quality content, social media and legitimate SEO tactics. Subsequent chapters take readers through the sales conversion process while updating us on visual content and software tools. Most books take the opposite approach, thereby making the case for revenue generation rather weak.
